

Trudy is truly a master at her craft. She brings with her a level of knowledge that is so in depth I doubt there are any situations she would not be prepared for. More than just her extensive knowledge, she also brings a wealth of experience that is a huge time saver and allows her to dive almost instantly into her work pointing out trouble areas pretty much immediately.

Through an extensive skype conversation with her where she gave us some invaluable tips, we thought we were able to get a proper handle on our mosquito problem. However, once she came to visit we realized just how important it was to have her here in person, informing our staff and management of the proper techniques for noticing and eradicating the pests at their source.

Trudy's passion for what she does is infectious, and she has all the right attributes to fully engage our staff into not only carrying out the practices here at Calabash, but many of them even have even taken them to their homes and communities.

For anyone who has a mosquito problem, I would highly recommend bringing in Trudy to assist your staff in the fight. You will surely not regret it.
